

# **Filling out the CEN Profile**

## **What information is required when filling out My CEN Profile?**

Basic information required when filling out your My CEN Profile online include:

- Name (First and Last)
- City
- State
- Zip Code
- Church Name

## **Why is this information required?**

Information is required to support CEN's search capabilities for: specific location and incident response; search by role and expertise; and for building your local interactive response network. In times of crisis or impending disasters, CEN may distribute an alert or information specific to a given region. Having zip codes, cities and states in our profiles, allows CEN the flexibility to communicate directly with affected individuals, instead of sending mass communication, which may not apply to everyone. The more detailed your My CEN Profile is, the easier it will be to communicate with you regarding information you may be interested in.

## **How secure is my information that is posted online?**

All information filled out in your CEN My Profile is only viewable by CEN members. The CEN national team regularly reviews all sign ups to prevent spam, improper language or messages, and advertisement. If you believe you have been contacted improperly, please contact us by email at [mail@christianemergencynetwork.org](mailto:mail@christianemergencynetwork.org) include the username of who contacted you. CEN's policy is to never share member lists or information with external organizations. CEN encourages each CEN ReadyChurch or ReadyCity to adopt the same policy insuring all data transactions are secure and align with their Christian mission.
